

§ 280.9

30 CFR Ch. II (7–1–99 Edition)

(3) The dates on which the actual activities were performed;

(4) A narrative summary of any mineral occurrences encountered including location, environmental features, and the nature and degree of adverse effects, if any, of the permitted activities on the environment, aquatic life, archaeological resources, or other uses of the area in which the activities were conducted;

(5) A report of the results of the environmental monitoring required in § 280.6(a)(8) of this part; and

(6) Such other descriptions of the activities conducted as may be specified by the Director.

(b) All persons shall immediately notify the Director of all serious accidents, any death or serious injury, or fire or explosion connected with any activity conducted pursuant to this part.

§ 280.9 Recordkeeping.

(a) Any permittee who acquires rock and mineral samples under a permit shall keep for 1 year after submittal of the final report a representative split of each geological sample and a quarter longitudinal segment of each core which shall be available for inspection at the convenience of the Director who may cut such core and geological samples for retention by MMS.

(b) Any permittee who acquires G&G data and information under a permit shall keep the data and information available for 3 years after submittal of the final report. The data and information shall be available for inspection and copying at a location within the appropriate OCS Region or at another location approved by the Director. The records shall include environmental data and information; G&G data and information; drill logs; analyses of cores, cuttings, and samples; and maps and navigation tapes showing the location where samples were taken and test drilling conducted.

§ 280.10 Environmental effects.

The potential of proposed prospecting or scientific research activities for adverse impact on the environment will be evaluated by MMS to determine the need for mitigation measures. The MMS anticipates that activities of the

type listed below typically will not cause significant environmental impact and, in accordance with 516 DM 6, Appendix 10 to the Departmental Manual, will normally be categorically excluded from additional environmental analysis. The types of activities include—

(a) Gravity and magnetometric observations and measurements;

(b) Bottom and subbottom acoustic profiling or imaging without the use of explosives;

(c) Mineral sampling of a limited nature such as that using either test drillholes or cores to less than 300 feet below the seafloor;

(d) Water and biotic sampling, if the sampling does not adversely affect shellfish beds, marine mammals, or an endangered species or if permitted by the National Marine Fisheries Service or another Federal Agency;

(e) Meteorological observations and measurements, including the setting of instruments;

(f) Hydrographic and oceanographic observations and measurements, including the setting of instruments;

(g) Sampling by box core or grab sampler to determine seabed geological or geotechnical properties;

(h) Television and still photographic observation and measurements;

(i) Shipboard mineral assaying and analysis; and

(j) Placement of positioning systems, including bottom transponders and surface and subsurface buoys reported in Notices to Mariners.

§ 280.11 Notification.

(a) The Governor(s) of adjacent State(s) shall be notified by the Director with a copy of the application for a permit with the accompanying plan immediately upon the submission of an application for approval.

(b) In cases where an environmental assessment is to be prepared, the Director will invite the Governor(s) of adjacent States(s) to review and provide comments regarding the proposed activities. The Director's invitation to provide comments shall allow the Governor a specified period of time to comment.

(c) The Director shall notify Federal Agencies, as appropriate, with a copy
